WORK EXPERIENCE

Reserva Inc. | 2024.03 – 2025.02

Front End Developer | **Remoto**

Tasks:

- Designed and built interactive and responsive dashboards using React.js, enabling real-time data visualization and management.
- Integrated with Odoo backend endpoints to fetch, process, and display data on the frontend.
- Implemented state management solutions (such as Redux and Context API) to handle application state efficiently and scalably.
- Created reusable and modular React components to ensure code consistency and maintainability.
- Identified and resolved performance bottlenecks, optimizing component loading and rendering.
- Worked closely with the backend team to ensure smooth and efficient integration between frontend and backend.

Freelance Developer | 2022.03 – 2024.02

Full Stack Developer | **Remoto**

Tasks:

- Designing and developing websites with React.js, Next.js, and other technologies from the React.js ecosystem.
- Performing some projects forming team with other web developers using tools like Git, GitHub GitLab and agile methodologies like scrum with Jira.
- Documenting and testing isolated native web components built with Typescript using Storybook library.
- End-to-end testing with Cypress.
- Unit tests with Jest.
- Development of different types of web applications such as: e-commerces, blogs, landing pages, corporate pages, 3d pages and so on with WordPress. Always personalized according to customer requirements and focused on solving their business needs.

Cluz Studio Company | 2020.09 – 2022.02

Full Stack Developer | **Granma**, Cuba

Tasks:

- Designing and developing web pages with React.js, Next.js, Material UI(MUI), TailwindCSS, HTML 5, JavaScript and other technologies from the React.js ecosystem.
- Design and implementation of clean web architectures such as the DDD and hexagonal architecture using Node.js in the implementation of web microservices.
- Building web applications using React.js and technologies from its ecosystem.
- Implementation of relational and non-relational databases.
- Developing REST APIs and GraphQL APIs.

ID & AR Solutions | 2019.04 – 2020.08

Front End Developer | **Granma**, Cuba.

Tasks:

- Creation of the entire front end of the company's corporate site using React.js and consuming an API programmed in Laravel. It also integrates the Three.js library to perform the 3D rendering of the company's artisan products, which are modelled in Blender by the company's graphic designers.
- Working on SEO and optimization of the company's website
